DETAILED ACTION

Specification

The attempt to incorporate subject matter into this application by reference to application numbers 09/648,697, 09/648,502, and 09/648,853 (Patent Numbers 7,035,918, 6,968,384, and 6,842,896) is ineffective because the numbers are left blank in the specification on page 1.

Response to Arguments

Applicant's arguments, see Remarks, filed 11/11/2009, with respect to claims 1, 3-16, and 18-33 have been fully considered and are persuasive. The prior art rejection of these claims has been withdrawn. After a careful review a new rejection is made based on obvious type double patenting.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 3-16 and 18-33 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 8 of U.S. Patent No. 6,842,896. Although the conflicting claims are not identical, they are not patentably distinct from each other because they cover the same subject matter in differing scopes. Claim 1 and its dependents in the current application are more detailed claims that are covered by the broader management system claimed in claim 1 of the '896 patent. Claim 16 and its dependents in the current application are more detailed claims that are covered by the broader management method claimed in claim 8 of the '896 patent.

Allowable Subject Matter

Claims 1, 3-16, and 18-33 are allowed over the prior art.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
